

I have been a customer of VOOM since the beginning. I am strongly against Echostar buying the Rainbow 1 Satellite. I cannot get any more HDTV programming then from VOOM. We need the competition of a third DBS company and VOOM needs this satellite to exist. Please do not allow Echostar to take this satellite away from VOOM. If not I will be under the mercy of my local cable company which has very little HD programming. I am looking to buy another HDTV, but will wait to see if VOOM continues. If VOOM retains Rainbow 1 and stays in business I will buy another HDTV. Please let VOOM keep Rainbow 1. Do not let Echostar control the DBS business with DirectTV. We need VOOM as a third party competitor.
